

Bird Watching Basics

FREE LIVE Online Webinar – Available Anywhere!

March 24, 2015, 6:30 – 8:30 p.m.

For most people the term “bird watching” brings to mind little old ladies and men in khaki shorts. But bird watching isn’t just for seniors anymore – it is an extremely popular outdoor activity that people and families of all ages can enjoy. Birds are all around us – they are in the country and in the cities and towns. You can’t go anywhere in the world without encountering a new species of bird. It’s hard to ignore them, but many people know less about birds than they would like. If you are one of those people, join the staff of the Boreal Centre for Bird Conservation to learn about birding, why it’s so popular, what you’ll need to get started and the basics of bird identification.

Orange-crowned Warbler

From the Boreal Centre for Bird Conservation. The Boreal Centre for Bird Conservation (BCBC) is a Research, Environmental Education and Tourism Centre on Lesser Slave Lake. As well as being the home of the avian monitoring programs of the Lesser Slave Lake Bird Observatory, the BCBC is also a research field station hosting academic research projects on all aspects of boreal forest ecology.

Course Instructors:

Patti Campsall is the Executive Director at the Boreal Centre for Bird Conservation and embodies the BCBC's vision statement of 'Nurturing Stewards of the Boreal Forest'. Patti has a rich history in forestry and environmental education. She loves the outdoors and working with the young minds in our community. She not only keeps things going at the Boreal Centre, she is also involved in many community activities and programs, including the Junior Forest Wardens.

Nicole Linfoot is the Assistant Bander at the Lesser Slave Lake Bird Observatory. She fell in love with birds and birding when she visited the Observatory as part of a college field trip. Birding is now a huge part of Nicole's life and she couldn't imagine having a better job. She loves sharing her passion for birds and all things natural with others; hoping to inspire in them the same appreciation she has for the outdoors.
