

Trees and Plants of the Boreal Forest

The boreal forest is no place for wimps and the trees and plants that grow there are no exception. They need to be hardy and strong to survive harsh environmental conditions. Learn about the most common trees and plants of the boreal forest, their unique characteristics and adaptations to living in Canada's largest ecosystem. **Available Anywhere – LIVE Online**

Nov 07, 2012

6:30PM - 8:30PM

FREE, you must register to participate

All LIVE Online Classes are on Mountain Time Zone. Courses are recorded and the recordings are made available to participants for 30 days after the course. In order to participate you will need:

- Access to high speed internet
- Speakers and preferably a microphone (the best option is a headset)

About the Instructors:

MJ Munn-Kristoff is the Executive Director for the Lesser Slave Forest Education Society. MJ has been involved in forest education for over 25 years through various organizations and she loves to teach about the boreal forest, environmental awareness and forest ecology. MJ has spent extensive time in the outdoors and is familiar with the flora and fauna of the region.

For the last 5 years, Cori Klassen has been the Boreal Educator for both the Lesser Slave Forest Education Society and the Boreal Centre for Bird Conservation. She works jointly with both organizations and excels at teaching a variety of environmental education programs to schools and community groups. Cori enjoys learning everything about the boreal forest and passing on her newfound knowledge.

About the Lesser Slave Forest Education Society:

The society is committed to forest focused environmental education and is led by a dedicated group of volunteer representatives from industry, schools and government who share a common goal of environmental stewardship. Educational programming is developed and delivered by professional Forest Educators.
